BioStar 2

Web-based Open Integrated Security Platform

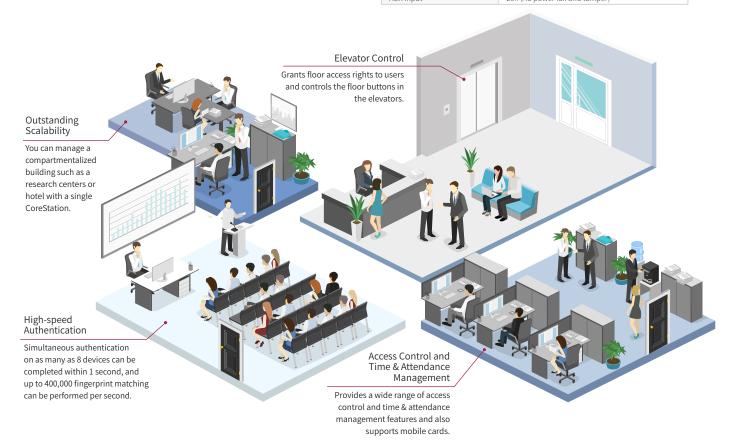

Centralized System I Access Control and Time & Attendance Management

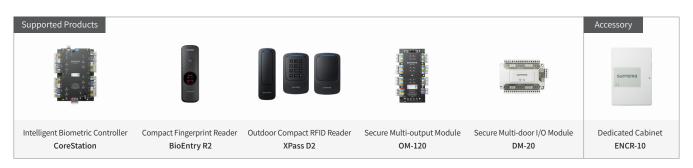

With Suprema's CoreStation and readers, you can build a centralized system, which is a system based on access control units (ACU). Suprema's centralized system not only provides the benefits of biometrics, but it also provides enhanced security and excellent system scalability. In addition, the centralized system also enables you to upgrade your existing systems at lower installation cost. Integrated with BioStar 2, this system safely stores all information about each user including the user's name, ID, PIN, access rights and fingerprint data by storing it on a single device. Suprema's intelligent biometric controller, CoreStation, is capable of performing fingerprint matching as well as RFID cards. It provides differentiated performance and features based on a 4-channel module that boasts superior hardware performance and scalability.

Strength in numbers

- Performs 400,000 times of fingerprint matching within 1 second
- Stores information about up to 500,000 users and RFID cards
- Stores up to 5,000,000 text logs
- Controls up to 132 Wiegand devices (DM-20 connection required)
- Controls up to 64 RS-485 devices
- Processes fingerprint authentication on up to 8 devices simultaneously within 1 second

CoreStation Specs.			
CPU	1.4 GHz Octa Core		
Memory	8 GB Flash + 1 GB RAM		
Maximum No. of Users	500,000 (1:1) and 100,000 (1:N)		
Maximum No. of Templates	1,000,000 (1:1) and 200,000 (1: N)*		
Maximum No. of Text Logs	5,000,000 (text)		
Serial Communication Protocol	OSDP V2		
Ethernet	10/100 Mbps and Auto MDI/MDI-X		
RS-485	5ch		
Wiegand	4ch Input		
Relay	4 Relays		
TTL Input	8ch (Supervised input selectable)		
TTL Output	8ch		
AUX Input	2ch (AC power fail and tamper)		

BioStar 2 Platform

BioStar 2 is a web-based, open, and integrated security platform that provides comprehensive functionality for access control and time & attendance. Featuring a modular, flexible framework, the platform supports both the BioStar 2 Device SDK which is used to integrate Suprema's terminals with thirdparty systems and web APIs which are used to integrate the functionality of the BioStar 2 platform with third-party systems. In addition, in step with the mobile era, the mobile app for BioStar 2 has been designed to enable you not only to remotely control the BioStar 2 platform but also to get a mobile card issued to you for use.

Visitor Management

Supports for application and approval of visits and set up visitable areas using the Visitor Management Portal

System Integration Support Supports both platform integration based on RESTful Web APIs and SDK-based

hardware integration (BioStar 2 API, BioStar 2 Device SDK).

BioStar 2

Flexible System Architecture

Supports both centralized and distributed systems and can thereby provide the optimal system.

Remote Control and Mobile Cards

> Provides user registration, real-time alarm, and door control in the BioStar 2 Mobile app and also supports mobile card authentication.

Optimal Access Control Solution

Supports all access control features such as door/elevator/zone control, graphic map, server matching, video logs, image logs, and audit trail

Flexible Time & Attendance **Management Solution**

You can set various work rules and create personalized time & attendance reports, and timesheet calendar view and setting fixed/flexible shift are also supported.

Video Logs Support

Any event that occurs at a door is recorded with an NVR and IP camera and can be monitored.

Subdivided user information registration

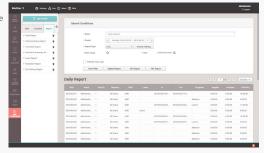

Visitor Management Portal

Enhanced monitoring capabilities

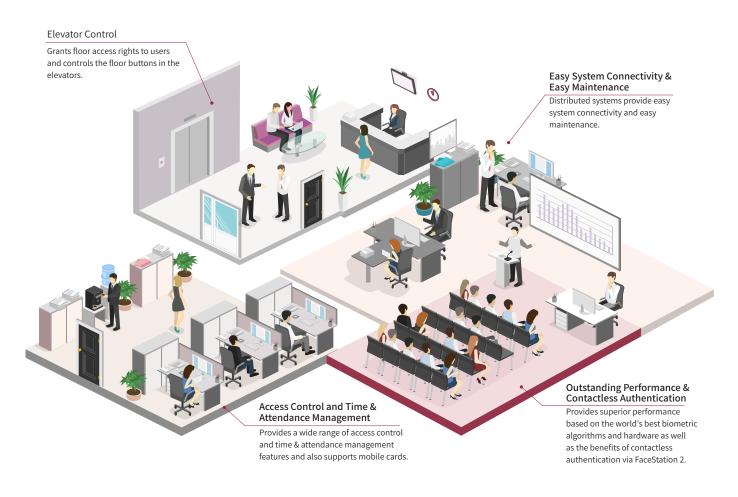

Multi-functional time & attendance management reports

Distributed System | Access Control and Time & Attendance Management

In distributed systems, IP terminal and readers perform the roles of a controller and reader simultaneously.

Therefore, you can undertake functions such as user management, access control management, and biometrics with a single terminal. Suprema's IP terminals and readers improve system reliability with easy system configuration and distributed management. It also provides the benefits of simple wiring and low installation/maintenance costs.

BioStar 2 Mobile

BioStar 2 Mobile enables you to freely control BioStar 2 anywhere, anytime on your smart device. Developed based on BioStar 2's web APIs, BioStar 2 Mobile provides services appropriate for the mobile era, including user information registration, BioMini-based fingerprint registration, door control, real-time door and zone status notification, and access control event monitoring. In addition, mobile cards which you can issue via BioStar 2 are an authentication means capable of completely replacing existing plastic cards, and they help you build the most convenient and innovative mobile access control solutions.

Remote Door Control

Real-time Door and Zone Status Notification

Access Control Event Monitoring

Mobile Cards

BioStar 2 Mobile Card

BLE Bluetooth Low Energy

Communicates with Android devices via BLE Protects data communication with the encrypted AES 128-bit algorithm

NFC Near Field Communication

Communicates with Android devices via NFC's HCE Protects data communication with the encrypted AES 128-bit algorithm

HCE is not available from all Android mobiles, please check the specification.

S --- Bluetooth*

BLE Bluetooth Low Energy

Communicates with iOS devices via BLE Protects data communication with the encrypted AES 128-bit algorithm
