

## **Universal Bank Note Validator**

# The Only one™

- Universal Validation Architecture
  & Extended Memory to Accept
  all Currencies
- Single Hardware Platform to Reduce Support and Operation Cost
- Multiple Value Added Extensions
  & Configurations to Best Fit Your
  Requirements

### **Universal Bank Note Validator**

### **Exceptional Performance:**

- 98% first-time insertion Acceptance rate
- Advanced sensor technology scans both sides of the bill—optimizing recognition
- Self-centering transport guides that automatically adjust to and perfectly align bills or bar-coded coupons of different widths— even when fed at an angle

#### Flexible Design:

- Global design—one product for all coun tries/all currencies
- Dual power options-12v or 24v
- Flexible interfaces options (all major industry interfaces in one board)
- Quick and easy BlueChip™ validation smart-stick memory that updates software and/or firmware in a flash
- Supports major industry communication protocols for any retrofit projects
- Global currency supporting over 50 countries for bill widths of 62mm to 85mm
- Multiple front bezels options
