

intimus degaussers rely on APT (Advanced Pulse Technology™). During the erase an effective quick burst generates a strong and powerful pulse. This results in 90% lower energy consumption compared to other models. At the same time they produce an erasing field many times stronger than those produced by the read/write heads in hard drives and tape drives. The field strength of an intimus degausser destroys the magnetic structure and ensures that the data are no longer recoverable by computer or laboratory attacks. Since the technology does not rely on software, it will also completely and permanently erase failed and damaged hard drives regardless of the operating system or interface. Built-in safeguards check the stored power before each erase cycle, ensuring complete erasure every time. A field strength meter, audible tones and lighted push buttons report the status of the degausser to the user.

With its compact dimensions, quiet operation and a 60 second cycle time, the intimus 8000 can fit right on a desktop.

- ✓ Fast, safe and complete erasure in only one go
- ✓ APT (Advanced Pulse Technology) - up to 90% less energy consumption than other models
- ✓ Shielded, no danger for magnetic data carriers, watches or credit cards in the surrounding

Technical data

Capacitive discharge:	Sí
Max. media size:	149/109/38 mm
Power consumption while charging:	4,0
Power consumption during standby:	0,2
Power consumption at erase:	0,5
Erasing time first hard drive sec:	60
Cycle time repetitive cycle:	60
Magnetic Field (Oe):	8.300 / 0,83 Tesla
Supply voltage (Volt):	230 Volt
Weight gross (kg):	22 kg
weight net (kg):	19 kg
Warranty on machine (years):	2 years
Depth (cm):	31 cm
Height (cm):	19 cm
Width (cm):	45 cm
Packaging dimensions (L/W/H):	46/31/19 cm
Packing unit:	1
