smartserve™ 200

Provide users an easy-to-use and confidential way to check out their own library materials

smartserve™ 200 is an extremely easy to use countertop self-service kiosk for libraries. From the very first use, users will experience reduced wait times, heightened privacy and increased independence as they control their own transactions. With RFID embedded in the base of the smartserve™ 200, items are read instantaneously providing maximum convenience.

With a non-intrusive look, smartserve™ 200 will compliment the interior of your library and blend with existing furniture.

Perfectly capable for the check-in and out of books, smartserve™ 200's features can also be easily extended to provide a full range of media case unlocking capabilities and the ability to collect fines and fees.

With the implementation of a smartserve™ 200, library staff are allowed more time to assist users, promote reading and offer personalised customer service along with a reduction in repetitive strain injuries.

Payment of fines and fees
The easy-to-use interface makes self-checkout fast and simple. Add on the functionality for users to pay their fines and fees right at the kiosk with the swipe of a credit/debit card.

Seamless integration with library ILS/LMS
Compatible with nearly all ILS/LMS systems, smartserve™ 200 uses SIP2 to communicate with the library's existing database.

Barcode only checkout option
The smartserve™ 200 can be used as a barcode only 'no security' self checkout kiosk even though it's RFID ready. It is capable of barcode only self-checkout and ready for RFID use in the future if your library chooses to implement RFID technology.

Protect your media collection
Optional media case unlockers combined with smartserve™ 200 increase library security.

Integrated receipt printer
A built in graphics-capable thermal receipt printer is included, which provides the user with a complete simple statement of items that are currently on their account.

smartserve200™

Countertop self-checkout for library users

Dimensions (w x d x h)

Millimeters: 560 x 530 x 590
