

HARTING SmokyThek®

Proven, legally compliant, flexible

Pushing Performance

People | Power | Partnership

The SmokyThek® ranks as the classic theft prevention solution for tobacco products at the point of sale. Boasting a proven track record that spans many years, it is now even more versatile. The latest solution offers expansion options for larger products, as well as networking capabilities. Thanks to its extreme variability, the unit can be seamlessly integrated into all check-out lane situations.

The SmokyThek® - complies with all legal and efficiency requirements

The SmokyThek® has long established itself as an indispensable tool in the check-out lanes of successful retailers. Integrated perfectly into the checkouts, this space-saving concept utilizes the area beneath the check-out conveyor belt in a way that retailers have the opportunity to turn even more shelf space into display areas for additional impulse-buy merchandise.

- Theft-proof storage of tobacco products, securely holds up to 84 different types of tobacco varieties
- Optional product dispenser set-up: merchandise is released to the customer or to the cashier
- Designed for optimum integration into single and double check-out consoles
- Filling capacity accommodates up to 1000 packages
- Ensures compliance with the first-in-first-out principle
- Available in customer specific colors
- offered with keypad or touch-PC & HA-Portal®

SmokyThek®

Proven, legally complaint, flexible

Pushing Performance

People | Power | Partnership

There are two ways to realize your product choice: with the approved keypad or the new and future-proof touch-PC, having a flexible interface and network towards HA-Portal®. Of course, both systems are available for double SmokyThek®, too.

touch-PC

keypad
