Security Rating	V/7,500(N2)48/90:0/0 V/7,500(N2)64/90:2.3/2.7

Brief overview of product range:

The ATG Access SP400 is available in a multitude of finishes and operations making this product one of our most versatile bollard ranges. This product is tested to PAS 68 standard, arresting a 7,500kg vehicle travelling at 40mph.

The SP400 automatic is a hydraulically operated, fully automatic bollard offering outstanding protection whilst allowing vehicle and pedestrian access when needed. The fixed option complements the range allowing a complete, robust perimeter protection solution.

Also available as a shallow mounted, fixed bollard with a civil installation depth of only 176mm. This range of bollards offers an answer to a vast range of security requirements. Offering excellent pedestrian and vehicle permeability, great aesthetics and PAS 68 rated protection.

Applications this product will protect:

All sites requiring protection from a high velocity attack.

King's Palace, Malaysia

Westfield Shopping Centre, London
